Tool for calculating the fabric amount

Now available as an app

NEWAVE Stoffmengen Kalkulator

Google play | Download on the App Store

Available for Android in the Google Play Store,
for iOS in the App Store, and in the Windows Phone Store!

Our Newave calculator is now also available as an app. You can use it to calculate the amount of the needed fabric and gliders.

For fabrics without a pattern repeat please use the first input mask.
The regular markings on the tape can be used in this case.

Calculating tool for fabrics without pattern repeat
Please enter the following:
1) Desired fullness
2) Desired curtain width
3) Distance between the gliders
4) Allowance for the seam
on the left and right side

Results: possible curtain widths, amount of gliders, depth of the pleats, needed fabric amount. For fabrics with a certain pattern repeat, please use the second input mask. We recommend to use a pattern repeat between 24 cm and 46 cm or a perect fall of the pleats.

Calculating tool for fabrics with pattern repeat.
Please enter the following:
1) Pattern repeat
2) Desired curtain width
3) Distance between gliders
4) Allowance for the seam
on the left and right side

Results: curtain width, fabric width, amount of gliders, fullness, needed fabric amount.

Go on to **www.gerster.com** to use our fabric amount calculator in 7 languages!
